4. Restricted Cash

The Company has a corporate credit card with a major financial institution with an aggregate credit limit of \$25,000. As at June 30, 2023, the financial institution holds \$25,000 in one Guaranteed Investment Certificate (December 31, 2022 - \$25,000) as collateral on the credit card amount as long as the credit card is active. The restricted cash amount would change if there was any change in the credit limit on the card.

5. Norvista Capital I Limited Partnership

On March 14, 2016, a partnership was formed under the name of Norvista Capital I Limited Partnership (the "LP"). A wholly owned subsidiary of Olive, Norvista Capital General Partner I Ltd., serves as the "General Partner" of the LP and the Company serves as the manager of the LP and provides investment management services to the LP and is responsible for the day-to-day business of the LP. The LP has been created by the Company to avoid concentrated equity ownership in Olive while accommodating institutional investors who want to make private equity investments in the junior resource space and have such investments sourced, structured and managed by Olive. As at June 30, 2023, the General Partner had no partnership units in the LP.

The General Partner is entitled to 0.01% of the net income or net loss of the LP and the LP pays the General Partner an annual management fee equal to 2% of their net asset value, calculated and paid monthly in arrears. During the three and six months ended June 30, 2023, the General Partner recorded a management fee of \$nil (three and six months ended June 30, 2022 - \$6,735 and \$13,303, respectively).

On or before the dissolution of the LP or implementation of one of the liquidity alternatives, an incentive bonus will be payable by the LP to the General Partner calculated as 15% of the amount by which the increase in the Net Asset Value from formation until dissolution of the LP exceeds a threshold increase of 10% per annum compounded annually, excluding the effect of distributions to the LP, if any. The one-time performance fee, if any, will be paid within 10 calendar days of the dissolution date of the LP. As at June 30, 2023, no performance fee is expected.

On November 18, 2022, the Company acquired, from three arm's length vendors, all of the limited partnership units of Norvista Capital I LP for 10,373,961 common shares of Olive (the "Transaction").

In accordance with IFRS 3 - Business Combination, the substance of the Transaction is an asset acquisition. The Transaction does not constitute a business combination as the LP did not meet the definition of a business under the standard.

IFRS 2 applies to transactions where an entity grants equity instruments and cannot identify specifically some or all of the goods or services received in return. Because Olive would have issued shares with a value in excess of the value of assets received, IFRS 2 would indicate that the difference is recognized in investments in public companies' shares acquired. The amount assigned to the investment in public companies' shares was \$339,884.

The fair value of the consideration was determined based on fair market value of \$0.03 per share on the acquisition date of November 18, 2022.

12. Capital Disclosure

The Company considers its capital to consist of share capital, contributed surplus, and deficit. The Company's objectives when managing capital are: (a) to allow the Company to respond to changes in economic and/or marketplace conditions by maintaining the Company's ability to purchase new investments; (b) to give shareholders sustained growth in value by increasing shareholders' equity; while (c) taking a conservative approach towards management of financial risks.

The Company's management reviews its capital structure on an on-going basis and makes adjustments to it in light of changes in economic conditions and the risk characteristics of its underlying investments. The Company's current capital is composed of its shareholders' equity and, to-date, has adjusted or maintained its level of capital by: (a) raising capital through equity financings; and (b) realizing proceeds from the disposition of its investments.

13. Fair Value Measurements

Fair value of financial instruments

The Company has determined the carrying values of its financial instruments as follows:

- i. The carrying values of cash and cash equivalents, amounts receivable and accounts payable and accrued liabilities approximate their fair values due to the short-term nature of these instruments.
- ii. Public investments and non-public investments are carried at amounts in accordance with the Company's accounting policy as set out in Note 2 to the consolidated financial statements for the years ended December 31, 2022 and 2021

There were no transfers to or from level 3 of the fair value hierarchy during the three and six months ended June 30, 2023.

The following tables illustrate the classification and hierarchy of the Company's financial instruments, measured at fair value in the statements of financial position as at June 30, 2023 and December 31, 2022:

As at June 30, 2023 - (Investments, at fair value)

13. Fair Value Measurements (Continued)

Fair value of financial instruments (continued)

As at December 31, 2022 - (Investments, at fair value)

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Aggregate Fair Value

Non-public investments	-	-	632,867	632,867
Investments in loans and convertible debentures	-	-	1,489,789	1,489,789

Level 3 hierarchy:

The following table presents the changes in fair value measurements of financial instruments classified as Level 3. These financial instruments are measured at fair value utilizing non-observable market inputs. The net change in unrealized gains is recognized in the statements of loss.

Non-public investments:

Investment at fair value	Opening balance at January 1	Purchases	Net unrealized gain (loss)	Ending balance
June 30, 2023	\$ 632,867	\$ 527,192	\$ (363,652)	\$ 796,407
December 31, 2022	\$ 53,789	\$ 566,263	\$ 12,815	\$ 632,867

Investments in loans and convertible debentures:

Investment at fair value	Opening balance at January 1	Purchases	Realized Conversion of convertible debentures (loss) on conversion	Realized gain (loss) on Interest income	Unrealized loss	Ending balance	
June 30, 2023	\$ 1,489,789	\$ 920,781	\$(1,258,923)	\$ 331,793	\$ 45,855	\$ (11,650)	\$ 1,517,645
December 31, 2022	\$ -	\$ 1,617,364	\$ (76,424)	\$ (114,045)	\$ 44,276	\$ 18,618	\$ 1,489,789

Within Level 3, the Company includes non-public company investments and investments in convertible debentures. The key assumptions used in the valuation of these instruments include (but are not limited to) the value at which a recent financing was done by the investee, company-specific information, trends in general market conditions, the marketability of the shares and subsequent transactions.

13. Fair Value Measurements (Continued)

Level 3 hierarchy (continued):

The following table presents the fair value, categorized by key valuation techniques and the unobservable inputs used within Level 3 as at:

June 30, 2023

Investment name	Valuation technique	Fair value	Unobservable inputs
Non-public investments	Recent financing approach	\$ 796,407	Transaction price
Investment in loans and convertible debentures	Recent financing approach	1,517,645	Transaction price

As the valuation of investments for which market quotations are not readily available and are inherently uncertain, the values may fluctuate materially within short periods of time and are based on estimates, and determinations of fair value may differ materially from values that would have resulted if a ready market existed for the investments.

For those investments valued based on a transaction price, management has determined that there are no reasonably possible alternative assumptions that would change the fair value significantly as at June 30, 2023. A 10% decrease (increase) on the fair value of these investments will result in a corresponding decrease (increase) of approximately \$231,000 in the total fair value of the investments. The Company has applied a marketability discount of 0% to its non-public investments valued based on recent financing. Had the Company applied a marketability discount of 5% it would have resulted in a corresponding decrease of approximately \$115,000 in the total fair value of the investments. While this illustrates the overall effect of changing the values of the unobservable inputs by a set percentage, the significance of the impact and the range of reasonably possible alternative assumptions may differ significantly between investments, given their different terms and circumstances.

The sensitivity analysis is intended to reflect the uncertainty inherent in the valuation of these investments under current market conditions, and its results cannot be extrapolated due to non-linear effects that changes in valuation assumptions may have on the fair value of these investments. Furthermore, the analysis does not indicate a probability of such changes occurring and it does not necessarily represent the Company's view of expected future changes in the fair value of these investments. Any management actions that may be taken to mitigate the inherent risks are not reflected in this analysis.

14. Commitments and contingencies

From time to time, the Company may be named as a party to claims or involved in proceedings, including legal, regulatory and tax related, in the ordinary course of its business. While the outcome of these matters may not be estimable at period end, the Company makes provisions, where possible, for the estimated outcome of such claims or proceedings. Should a loss result from the resolution of any claims or proceedings that differs from these estimates, the difference will be accounted for as a charge to net income (loss) in that period. As at June 30, 2023, the Company does not have any outstanding claims against it.
